

Keynote Presentation by:

Dee Kumpar,

RN, BSN, MBA, CSPHP, Director – Safe Patient Handling Programs & Services, Clinical Marketing Consultant, Hill-Rom

Dee has more than 30 years of experience as a registered nurse in Surgery, Labor and Delivery, Management, Employee Health, and Corporate Risk Management.

She obtained her BSN from the University of Michigan and an MBA through Marylhurst University. She worked with the ANA to write the ANA SPHM Standards released June 2013. Prior to working for Hill-Rom she worked with a major Health System where she participated in the development and implementation of a system-wide safe patient handling program; the program was awarded the Best Practice award by the VA at the SPHM 2008 conference. As a consultant with Hill-Rom Dee works to engage health care systems in program development including strategies to address culture change, ensure a successful program launch, and achieve desired outcomes relative to injury prevention practices and improved patient outcomes.

The Complications of Immobility

May 14th, 2014
@ 2:00 PM Eastern
(60 minutes)

1 Contact Hour

**ASPHP Members:
\$25.00**
**Non-Member:
\$75.00**

Upon completion of this webinar the participants will:

- ✓ **Understand the importance of early patient mobility**
- ✓ **Recognize the traditional standards of care for patient mobility**
- ✓ **Understand institutional costs associated with immobility**

This presentation will illuminate why mobility is essential early on in the ICU. Early mobility in the ICU prevents deconditioning that impacts all of our body systems. This can place the patient at risk for prolonged ventilation and fall risk once we do get them out of bed.

Technology Requirements PC-based attendees Required: Windows® 7, Vista, XP or 2003 Server
Macintosh®-based attendees Required: Mac OS® X 10.5 or newer

Provider approved by the California Board of Registered Nursing,
