The ASPHP Certification Group has established nine core competencies, identified as subject areas beneficial for those leading and supporting SPHM programs. While a Clinician applicant is not expected to be proficient in all of these, there are five skill sets that have been identified as directly related to the successful application of SPHM “at the bedside:” clinical knowledge & experience, training deployment, unit-specific customization, team leadership, risk analysis & control. These are the skill sets that the certification committee will look for in the applicant’s work history, recommendations, professional development, and resume.

NINE CORE COMPETENCIES: Skill Areas

Financial Acumen - Demonstrated through budgeting, cost justification and/or vendor negotiation

Team Leadership - Demonstrated through assembling and leading a cross functional team

Policy and Procedure Deployment - Demonstrated through the development, modification and implementation of SPH P&P

Training Deployment - Demonstrated by development and delivery of training

Clinical Knowledge & Experience - Demonstrated through clinical job duties

Risk Analysis & Control - Demonstrated through formal analyses and linking control measures to risk results

Program Promotion - Demonstrated by promoting the benefits and/or results of the SPH program internally and externally

Program Audit - Demonstrated by a formal review and reporting of program performance

Unit Specific Customization - Demonstrated by adapting procedures to unit specific and patient specific needs.
