Webinar

The Changing Face of Safe Patient Handling

Thursday, June 14th, 2012
@ 2:00 PM Eastern

(60 minutes)

Rick Barker, Senior Consultant and Ergonomics Engineer for Humantech, Inc., has consulted with clients from diverse industries representing the aerospace, appliance, automotive, consumer product, defense, chemical, electronics, food and beverage, healthcare, pharmaceutical, petroleum, steel, and heavy-vehicle manufacturing fields. Since first joining Humantech, Inc. in 1991, Rick has accumulated years of ergonomics and human factors consulting experience including a variety of human factors and ergonomics positions with Hill-Rom focused on safe patient handling. Prior to joining Humantech, Inc., he worked as an ergonomics engineer in product development at Unisys.

Upon Completion of this Course, participants will be able to:

✔ Describe at least 5 skills needed to effectively manage a safe patient handling program
✔ Describe the benefits of program auditing
✔ Identify at least 3 strategies for promoting a safe patient handling program

Rick will look at an overview of the advances in safe patient handling technology and the accompanying changes in the requirements of managing an effective program.

Keynote Presentation by:

Rick Barker,
MA, CPE, CSPHP
